DETAILED ACTION

Response to Amendment

1. Applicant's arguments with respect to Claims 1, 4, and 9-11 have been considered but are moot in view of the new ground(s) of rejection. In light of Applicant's amendment, new grounds of rejection are made for Claims 1, 4, and 9-11. See below. As to the election/restriction requirement, there is still no allowable generic or linking claim; Claims 2-3 and 5-8 remain withdrawn from consideration, as indicated in the prior Office Action mailed December 16, 2005.

Claim Rejections - 35 USC § 102

1. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
2. Claims 1, 4, 9, and 10 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent No. 3,834,389 to Dulle.
3. For Claim 1, Dulle teaches a tampon for feminine hygiene including an insertion end, a withdrawal end, a longitudinal axis, and an outer surface (Figs. 1-12 and col. 1, lines 5-9). The tampon has compressed fibrous material (col. 3, lines 45-51, col. 4, lines 6-12, and col. 6, lines 5-22). The outer surface of the tampon includes a plurality of raised portions (Fig. 2 shows four raised portions). Each of the raised portions has a first width dimension x, a first width dimension x¹, a second width dimension y, and a second width dimension y¹ (Fig. 2). The insertion end includes the first width dimension x and the second width dimension y, the withdrawal end includes the first width

dimension x^1 and the second width dimension y^1 , and the first width dimension x is greater than the second width dimension y (note that the raised portions are wider at the insertion end, Fig. 2).

4. For Claim 4, Dulle teaches the raised portions being arranged in a pattern (a cross shape, Fig. 2).

5. For Claim 9, Dulle teaches a core which is highly compressed (foam core layer 22, col. 3, lines 45-54, col. 4, lines 23-27, col. 6, lines 23-46, col. 7, lines 6-14, and Claims 1 and 5).

6. For Claim 10, Dulle teaches the withdrawal end including a withdrawal member (string 23, Fig. 3 and col. 3, line 66 to col. 4, line 1).

Claim Rejections - 35 USC § 103

7. Claim 11 is rejected under 35 U.S.C. 103(a) as being unpatentable over Dulle in view of U.S. Patent No. 2,499,414 to Rabell.

8. For Claim 11, Dulle teaches all the limitations of Claim 1, as described above in paragraph 4. Dulle does not teach the withdrawal end including a finger indent. However, a finger indent in the withdrawal end is well known in the tampon art. Rabell teaches a tampon with a finger indent (recess 44, Figs. 8 and 10, col. 3, lines 19-24, and col. 5, lines 64-66). Rabell teaches that the finger indent accommodates the user's fingernail and also provides for packaging the withdrawal cord (col. 3, lines 19-25). It would have been obvious to one of ordinary skill in the art at the time of the invention by the applicant to modify Dulle to include a finger indent, as taught by Rabell, to

accommodates the user's fingernail and provide for packaging the withdrawal cord, as taught by Rabell.

Conclusion

9. Applicant's amendment necessitated the new grounds of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
